This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Welcome to Smart View Accessibility

This guide describes the accessibility features of Oracle Smart View for Office. For information regarding supported assistive technologies, refer to the *Oracle Enterprise Performance Management System Installation Start Here*.

Note:

- Keyboard equivalents for provider ribbons may vary if other Office add-ins or extensions are installed. For example, the keyboard equivalent **Y** may become **Y1** or **Y2** if there are ribbons created by add-ins in addition to Smart View.
- Keyboard equivalents for languages other than English may be different from those listed in the chapters in this guide.

Oracle customers have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/us/corporate/accessibility/support/index.html#info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program web site at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

[About Enabling Accessibility for Smart View](#)

[Working with JAWS](#)

[Enabling JAWS to Read ListView Headers](#)

About Enabling Accessibility for Smart View

You do not need to enable accessibility specifically for Oracle Smart View for Office; it is always in accessible mode. Smart View output is in the form of Excel spreadsheets, Word documents, and PowerPoint slides, which are accessible through Microsoft Office. For information about Excel, Word, or PowerPoint accessibility, refer to Microsoft Office product documentation.

Working with JAWS

If you are using JAWS® Screen Reading Software:

- Oracle recommends using the Internet Explorer browser.
- You must enable JAWS to read ListView headers, as described in [Enabling JAWS to Read ListView Headers](#).

Enabling JAWS to Read ListView Headers

ListViews display information in a table format within the Smart View user interface. Examples of dialog boxes that display information in the ListView format are **Select Forms** or **Manage Journals**.

ListView headers are the column headings within a ListView. By default, JAWS does not read the ListView headers; however, you can enable JAWS to read them.

To enable JAWS to read ListView headers:

1. Ensure that JAWS is running.
2. Within a ListView, select a row containing data, then press **Insert+F2**.
3. In the **Run JAWS Manager** dialog box, select **Customize ListView** and press **Enter**.

The **Customize Headers** dialog box is displayed

4. In the **Column Headers** group, select the **Speak Custom Text AND Header** option.
5. Click **OK** to save the changes.

JAWS should begin speaking the column headers in the ListView element. If this doesn't happen, restart the Office application.

Smart View Panel Navigation

Table 1 displays the keys for navigating in the Smart View Panel.

Table 7-1 Smart View Panel Navigation

Keys	Action
Alt+S+P	Launch the Smart View Panel
F6	Switch between Smart View and Office components
Tab	Scroll through Smart View Panel
Up and down arrow keys	Scroll through items in tree view
Left and right arrow keys	In toolbars, move through buttons In tree views, expand or collapse a node
Alt+tab	Move from tree view to Action Panel
Alt+down arrow	Open the drop-down menu
Up and down arrow keys	Scroll through drop-down list
Enter	Select an item in the drop-down menu
Escape	Cancel selection

8

Query Designer Panel Navigation

Table 8-1 Query Designer Panel Navigation

Keys	Action
F6	Switch between Query Designer and Office components
Tab	Moves through the dimensions on the Query Designer
Ctrl+Enter, when selected on a row or column dimension	Launches the Member Selection dialog box and highlights the corresponding dimension on the query sheet
Ctrl+Enter, when selected on a POV dimension	Adds the selected dimension to the Row dimensions group in the Query Designer

9

Smart Query Panel Navigation

Table 9-1 Smart Query Panel Navigation

Keys	Action
F6	Switch between Smart Query and Office components
Ctl+Enter	Set focus from a dimension down to its properties
Ctl+X and Ctl+V	Move dimensions between axes (select dimension, Ctl+X to cut dimension, Tab to target dimension, then Ctl+V to paste dimension)

10

Smart Query Ribbon Keyboard Equivalents

The tables in this chapter list ribbon items for the Smart Query ribbon.

Exceptions are noted in parentheses.

Smart Query Ribbon Keyboard Equivalents for Office 2010

Table 10-1 Smart Query Ribbon Keyboard Equivalents for Office 2010
(assumes Smart Query ribbon is Alt+Y+1)

Key	Action
Alt+Y+1+Y+3	Analyze
Alt+Y+1+Y+4	Designer Panel
Alt+Y+1+Y+5	Copy
Alt+Y+1+Y+6	Paste
Alt+Y+1+Y+7	Save
Alt+Y+1+Y+8	Open
Alt+Y+1+Y+9	Refresh
Alt+Y+1+Y+A	Automatic Refresh
Alt+Y+1+Y+B	Change Alias
Alt+Y+1+Y+B, Down arrow key once + Enter	Change Alias, None
Alt+Y+1+Y+B, Down arrow key twice + Enter	Change Alias, More Alias Tables
Alt+Y+1+Y+C	Indentation
Alt+Y+1+Y+D	Show Distinct Member Names
Alt+Y+1+Y+E	Suppress Rows with No Data

Smart Query Ribbon Keyboard Equivalents for Office 2013

Table 10-2 Smart Query Ribbon Keyboard Equivalents for Office 2013
(assumes Smart Query ribbon is Alt+Y+1)

Key	Action
Alt+Y+1+Y+2	Analyze
Alt+Y+1+Y+3	Designer Panel
Alt+Y+1+Y+4	Copy
Alt+Y+1+Y+5	Paste
Alt+Y+1+Y+6	Save
Alt+Y+1+Y+7	Open
Alt+Y+1+Y+8	Refresh
Alt+Y+1+Y+A	Automatic Refresh
Alt+Y+1+Y+B	Change Alias

**Table 10-2 (Cont.) Smart Query Ribbon Keyboard Equivalents for Office 2013
(assumes Smart Query ribbon is Alt+Y+1)**

Key	Action
Alt+Y+1+Y+B, Down arrow key once + Enter	Change Alias, None
Alt+Y+1+Y+B, Down arrow key twice + Enter	Change Alias, More Alias Tables
Alt+Y+1+Y+C	Indentation
Alt+Y+1+Y+D	Show Distinct Member Names
Alt+Y+1+Y+E	Suppress Rows with No Data

Smart Query Ribbon Keyboard Equivalents for Office 2016

Installing and Configuring Help Locally

After installing Oracle Smart View for Office, the online help is retrieved from a URL hosted on the Oracle.com web site. This is the default behavior for Smart View, and no changes are required by users to launch help.

However, you may require that the help be installed locally for Section 508 accessibility purposes. To accommodate this, help must be downloaded from My Oracle Support and placed on a local drive, and the Smart View `properties.xml` file must be modified..

To install and configure Smart View help locally:

1. Obtain the help zip file for this release from My Oracle Support.
2. Extract the contents of the patch zip file to a local folder on the computer where Smart View is installed.

For example, extract the contents locally to:

```
C:\Oracle\SmartView\
```

Under the `smartview_help` folder, there are 28 language folders; for example:

```
C:\Oracle\SmartView
    \smartview_help
        \ar
        \cs
        \da
        \de
        \el
        \en
        \es
        \fi
        \fr
        \fr_CA
        \he
        \hu
        \it
        \ja
        \ko
        \nl
        \no
        \pl
        \pt
        \pt_BR
        \ro
        \ru
        \sk
        \sv
        \th
        \tr
        \zh_CN
        \zh_TW
```

The following language folders contain translated versions of the Smart View help:

```
\de
\es
\fr
\it
\ja
\ko
\nl
\pt_BR
\zh_CN
\zh_TW
```

The remaining language folders contain the English version of the help. When you run Smart View in one of those languages (for example, Swedish) and you click a button for Help, the English help is displayed.

Additionally, the English folder contains a copy of the help in PDF format, `smartview_user.pdf`.

3. Modify the `helpurlcontext` property in the Smart View `properties.xml` file:
 - a. In your Smart View installation, navigate to the `SmartView\cfg` folder.
 - b. Make a backup copy of the original `properties.xml` file.
 - c. Open `properties.xml` for editing.
 - d. Modify the `helpurlcontext` property, providing the path to the folder that is parent to the language folders, providing the path to the folder that is parent to the language folders using the following syntax:

```
<helpurlcontext>file:///parent_language_folder_path/</helpurlcontext>
```

Tip:

Use forward slashes in the syntax and ensure that you enter a final forward slash (/) after the parent language folder path that you provide.

Using the example from 2, after extracting the zip contents to `C:\Oracle\SmartView`, the `smartview_help` folder is the parent folder of the language folders. Thus, you would modify the `parent_language_folder_path` placeholder as follows:

```
<helpurlcontext>file:///C:/Oracle/SmartView/smartview_help/</helpurlcontext>
```

4. Restart your Microsoft Office applications and access the help from the Smart View ribbon.
5. Repeat this procedure for each computer that requires Smart View local help.
